Respected Sir/ Madam,

I am very passionate about statistics, data analytics. I like working with data and finding out how it can help me in getting my job done. I am a fresher who is still pursuing my academics. I am doing my post graduation in Statistics. I am interested in working with companies and gaining knowledge in the field of data analytics.

I am looking for part time jobs or internships in this field with a work from home set-up. I am open to moving to the job location if the internship is further converted into a job. I have little to no work experience in this field but I'm a quick learner. I have a habit of always learning something and that helps me be updated with latest technologies.

I have experience working as a Subject Matter Expert. I have knowledge about programming languages like R, Python, SQL, C++. I have done courses on Python, R and SQL from platforms like Udemy and Coursera. I would also like to mention that I am currently attending the Google Data Analytics Certificate from Coursera and Data Science Certificate from IBM and Google from Coursera.
I also am used to environments such as Git and GitHub.
I also had Economics and Mathematics as my minors during my Bachelors and excelled in them.
Also, I am enthusiastic and have basic knowledge about Finance.

My experiences involve:
a. I have been working as an SME and Textbook Solver for statistics at Chegg.
b. I have worked as an Intern in Innovalance Learning Systems as a Subject Matter Expert.
c. I have worked as an Intern in Data Science in Sparks GRIP Foundation.
d. I have worked as a Content Developer in Quizzy Pvt. Ltd.

I hope to hear from you soon and work with you and play a part in the bright future of the company and learn more about Data Analytics and Data Science in the process.
Also if you don't find me fit for this role, please let me know about any role in future that you feel would be a good fit for me and do let me know how I could have done better as that would help me a lot. Thank you.

Sincerely,

Sneha Mukherjee
